

## Summary of Contract Awards and Unit Prices

### CRITERIA FOR AWARDING CONTRACT TO A SECONDARY LOW VENDOR

Contracts may be awarded to the lowest bidder for all districts listed (if the bidder offered to serve all counties) and if the bidder is low for all counties. The contracts also may be awarded separately for each county if there is a different low bidder for each county (to any successful bidder who is low and offered to serve at least that county he is awarded). In each maintenance trade bid for each county in which an award is made, a “second (2nd) low bidder” will be awarded. The “second (2nd) low bidder” may be contacted to provide an estimate and to perform the services requested in the following circumstances:

1. When the “first (1st) low bidder” withdraws from the contract with the consent of the LEA for just and valid reasons.
2. When the “first (1st) low bidder” ceases to operate as a business due to bankruptcy, death of a sole proprietor, voluntary retirement from business, court order, loss of pre-qualification status from the state or any other just and valid reason.
3. When the call from the district relates to an “emergency service call” which if not responded to immediately by the “first (1st) low bidder” will affect the “health, safety and welfare” of district students, staff and/or others involved with the district.
4. When the district has requested on two or more occasions for an estimate as called for elsewhere in these specifications and has had “no response” from the “first (1st) low bidder”.
